## *Transportation program*

### *Transportation program designed to limit or decrease the parking area on campus*

- Since the construction of the university in 1996, there are nearly 56 Buses with low fees to transfer students.
- These buses are free for staff.
- In addition, the moving of private cars inside the university roads is restricted.
- buildings are connected by bridges or tunnels to decrease distances.
- There are many electric golf cars moving all over the day inside the campus to transfer students and employees.
- The Egyptian government plan to construct metro line beside the university (60 % finished).
- two storey underground parking.

1) two storey underground parking

2) Encourage students to use bicycles.

## 2- cycling lanes for staff and students

1- استخدام الدراجات داخل الحرم الجامعي للطلبة و العاملين للتنقل بين المباني داخل الجامعة مع اماكن خاصة للدراجات عند كل مبنى.

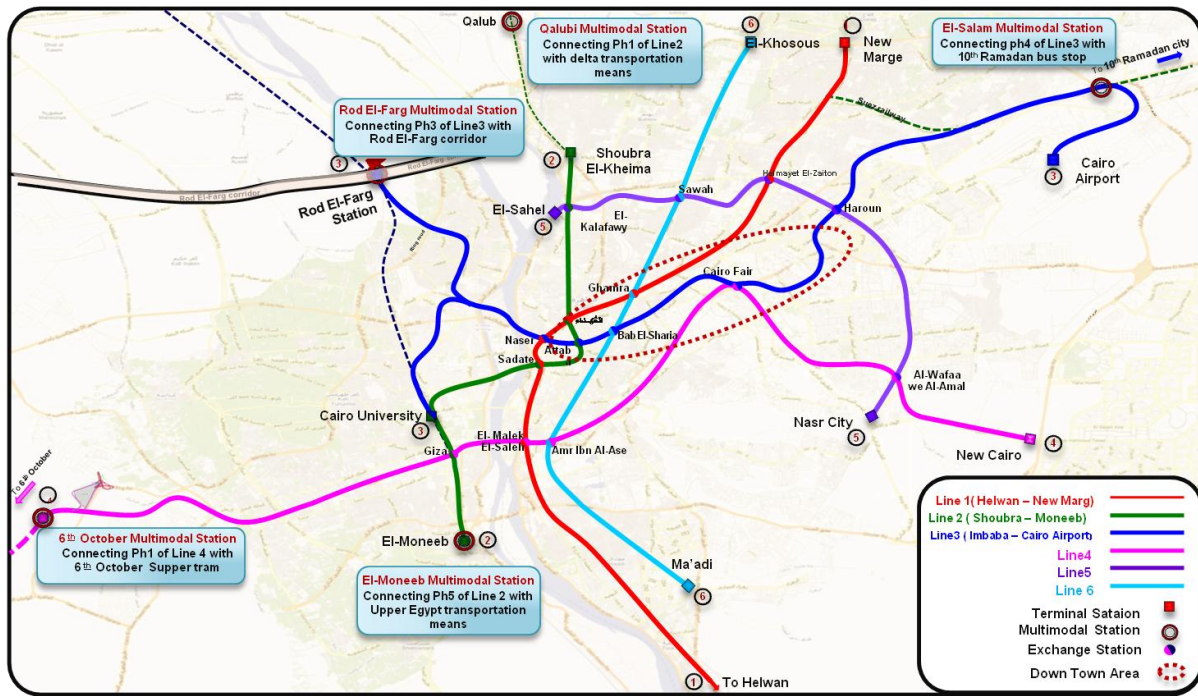

3) Partially applied plan to add bicycle stations on campus (images on right from web).

**4) Buses to transfer students, staff and employees to and from the university to decrease individual transportation.**

5) Electric golf cars that used inside the campus to transfer students and staff

6) The Egyptian government plan to construct metro line beside the university (80 % finished)

7). Defined Barking areas

8) Limiting parking area.

**9) Trees in the parking area to limit the spaces by green trees.**
