

## **Water Reuse Policy**

### **Policy Statement:**

October 6 University is committed to promoting sustainable and responsible water management practices across its campuses. The university recognizes the importance of water conservation and is dedicated to maximizing water reuse to minimize environmental impact and ensure efficient use of this critical resource.

### **Policy Details:**

#### **Scope:**

This policy applies to all October 6 University campuses and facilities, including but not limited to academic buildings, residence halls, recreational areas, and administrative offices. Water Reuse Measures:

The university will implement measures to maximize water reuse, including the collection, treatment, and distribution of reclaimed water for non-potable purposes, such as landscape irrigation, toilet flushing, cooling systems, and other suitable applications.

#### **Infrastructure Development:**

October 6 University will invest in infrastructure development to support water reuse, including the installation of water treatment and distribution systems and the utilization of appropriate technologies.

#### **Research and Innovation:**

The university will actively support and promote research and innovation related to water reuse technologies and practices, partnering with relevant academic departments and research centers.

#### **Education and Outreach:**

October 6 University will raise awareness and educate the university community about the importance of water conservation and reuse, encouraging responsible water practices among students, faculty, staff, and visitors.

### **Compliance:**

The university will ensure compliance with all applicable local, state, and federal regulations related to water reuse and will work in partnership with relevant authorities and agencies.

### **Monitoring and Reporting:**

October 6 University will establish a monitoring and reporting system to assess the effectiveness of water reuse efforts, track water consumption, and set goals for reduction and reuse.

### **Implementation Date:**

This Water Reuse Policy will go into effect on [1996].

### **Review and Revision:**

This policy will be periodically reviewed to ensure its effectiveness and alignment with the university's commitment to responsible water management. Review at 2021
