

## Policy on Restricting Vehicle Access within the University Campus to Reduce Emissions and Promote Sustainability

### 1. Introduction

The university is committed to implementing the principles of sustainable development and maintaining a clean, safe, and healthy campus environment. In line with this commitment, the university adopts a policy to restrict vehicle access within the campus to reduce carbon emissions, minimize noise and air pollution, and promote a culture of sustainable mobility, in alignment with the United Nations Sustainable Development Goals (SDG 11: Sustainable Cities and Communities, and SDG 13: Climate Action)

### 2. Objectives

- Reduce air pollution and greenhouse gas emissions caused by vehicles inside the campus.
- Improve air quality and promote the health and well-being of students, staff, and visitors.
- Encourage the use of sustainable transportation alternatives such as walking, bicycles, and electric vehicles.
- Enhance pedestrian safety and accessibility for all, including persons with disabilities.
- Contribute to achieving national and international sustainable development goals, particularly SDG 11 (Sustainable Cities and Communities) and SDG 13 (Climate Action).

### 3. Scope of Application

This policy applies to all university personnel, students, visitors, and service providers. It covers all conventional fuel-powered vehicles (gasoline and diesel) entering or operating within the university campus.
